

## **Project Design Phase-II**

### **Solution Requirements (Functional & Non-functional)**

Date	14 October 2022
Team ID	PNT2022TMID29187
Project Name	Classification of Arrhythmia by Using Deep Learning with 2-D ECG Spectral Image Representation
Maximum Marks	4 Marks

### **Functional Requirements:**

Following are the functional requirements of the proposed solution.

<b>FR No.</b>	<b>Functional Requirement (Epic)</b>	<b>Sub Requirement (Story / Sub-Task)</b>
FR-1	<b>User Registration</b>	✓ Registration through Form ✓ Registration through Gmail ✓ Registration through LinkedIN
FR-2	<b>User Confirmation</b>	✓ Confirmation via Email ✓ Confirmation via OTP
FR-3	<b>User interface</b>	Check your profile and choose your file
FR-4	<b>User input</b>	Upload image as jpeg/png format
FR-5	<b>Data processing</b>	Evaluating the model using test data training D1 algorithm for a accuracy result trained CNN model using Keras, Tensorflow
FR-6	<b>Image prediction</b>	Image will be predicted at the accuracy rate of 90.4%
FR-7	<b>Report generation</b>	Image will be shown as output

### **Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

<b>FR No.</b>	<b>Non-Functional Requirement</b>	<b>Description</b>
NFR-1	<b>Usability</b>	<ul style="list-style-type: none"><li>✓ Arrhythmia is an irregular heart rhythm from normal rhythm.</li><li>✓ Classification of arrhythmia with the help of deep learning.</li><li>✓ However, there were no studies dealing with usability of this sensor in this field testing.</li></ul>
NFR-2	<b>Security</b>	Users data cannot be accessed by unauthorized people.
NFR-3	<b>Reliability</b>	System performs their functions without failure.
NFR-4	<b>Performance</b>	<ul style="list-style-type: none"><li>✓ ECG signals augmenting training data manually could degrade the performance.</li><li>✓ Detect irregular heart beats</li><li>✓ Accuracy rate</li></ul>
NFR-5	<b>Availability</b>	Availability describes how likely the system is accessible to a user at a given point in time and the periodicity of the solutions.
NFR-6	<b>Scalability</b>	Performance does not be affected.
